

CROSSWRAPPING IN WTE PLANT THE KEY TO EFFICIENT FUEL HANDLING

INTAKE

- Loose or baled waste
- Readiness for waste amount fluctuations

WRAP

- Clean and effective way to maintain material energy value
- Allows waste intake during low energy demand season and maintenance breaks

STORAGE IN WRAPPED BALES

- Environmentally safe and cost efficient way to store the fuel
- Allow an outdoor storing – saving cost and space of indoor storage

OPEN

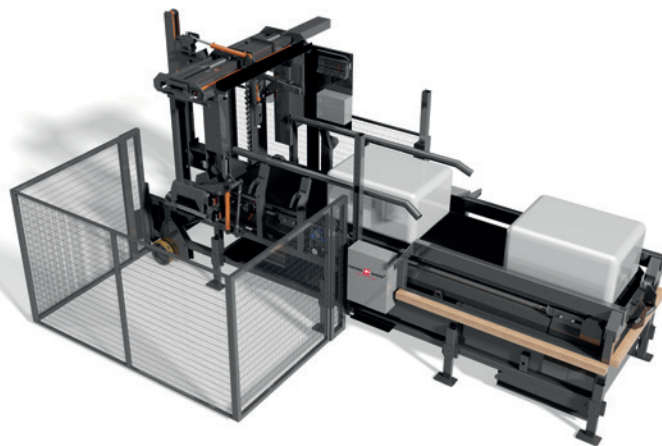

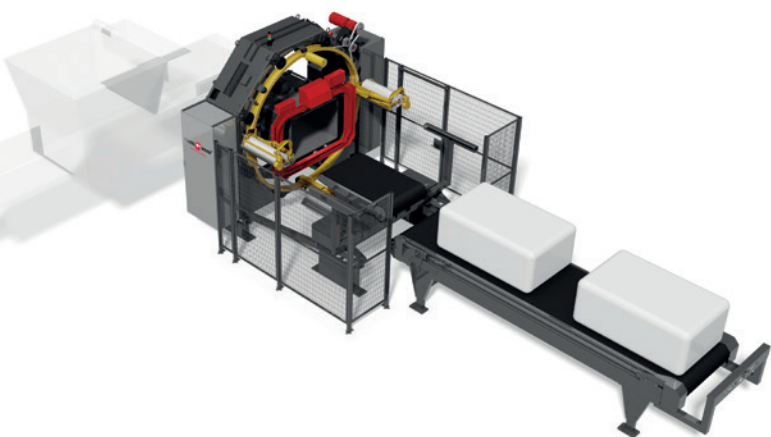

- CW Bale Opener opens the bales automatically – less labor and machinery cost
- Opens automatically rectangular and round bales – separates the ties and film from the baled material

REUSE

- CW machinery provide steady fuel flow for production
- CW machinery create flexibility for fuel handling

CROSSWRAPPING AND CW BALE
OPENERS PRODUCE EFFICIENT,
ENVIRONMENTALLY SAFE AND FLEXIBLE WAY
TO OPTIMIZE THE MATERIAL
FLOW OF YOUR WASTE-TO-ENERGY PLANT.

CROSS WRAP MACHINERY MAKES A SUBSTANTIAL DIFFERENCE IN FUEL INTAKE, HANDLING AND STORAGE.

CW 2200 BALE WRAPPER CW DIRECT BALE WRAPPER

- Automatic baling and wrapping make waste easy to handle, store or move
- Wrapped waste can be stored outside environmentally safe way
- Efficient waste storing during low energy demand seasons
- Provides cost effective waste handling during maintenance breaks and production interruptions
- Wrapped bales save space and improve employee's working environment as odor and litter are minimized
- Keeps plant clean and environmentally safe

CW BALE OPENER

- Automatic bale opening for the stored bales
- Separates the film and ties from the fuel
- Both round and rectangular bales can be opened with CW Bale Opener
- Easier and faster use of baled waste during high energy demand seasons
- Efficient – big capacity and low energy consumption
- Steady material flow to production
- Less labor, handling space and machinery needed

Cross Wrap Ltd. is the world leader in manufacturing automatic wrapping machines and bale openers for the waste industry, including RDF, SRF, MSW and recyclables. We also operate internationally in the wood products and other industries. 450 machines delivered to 55 countries – with more than 45.000.000 bales Cross Wrapped to date.
